INDEX: VOLUME 32

AUTHORS AND SUBJECTS

Accounting 81–91.
Action theory 53–65, 92–105.
Acyclicity 267–273.
Agnew, Neil McK.: see Brown, John L.
Alvarez. Juan M. de Lorenzana and Ward, Lawrence M. On evolutionary systems, 19–33.
Appleyard, Roger. Events and acts: The structures of their effects, 92–105.
Arousal 179–190.
Artificial intelligence 212–231, 274–292.
Artificial systems 179–189.
Bailey, Kenneth D. Operationalizing living systems, 153–158.
Bias 34–41.
Bixler, Ray H. Review of *Deception: Perspectives on Human and Nonhuman Deceit.*
Book Reviews:
Duncan, Starkey, Jr.; Fiske, Donald W.; with Denny, Rita; Kanki, Barbara G.; and Mokros, Hartmut B. *Interaction Structure and Strategy* (Elliot Mischler, reviewer).
Mitchell, Robert W. and Thompson, Nicolas S. Deception: *Perspectives on Human and Nonhuman Deceit.* (Ray H. Bixler, reviewer.)
Bouthelet, Lorraine: see Miller, James Grier.
Brown, John L. and Agnew, Neil McK. Feedback bias from ignoring the outcome of rejected alternatives, 34–41.
Bryant, Denise and Merker, Stephen L. A living systems process analysis of a public transit system, 293–303.
Carling, Alan H. The Schelling diagram: On binary choice with externalities, 4–18.
Carroll, Barbara. Expert Systems for Clinical Diagnosis: Are They Worth the Effort?, 274–292.
Catastrophe theory 121–137, 241–266.
Chaos 53–65.
Clinical diagnosis 274–292.
Cluster analysis 149–152, 153–158.
Community 81–91.
Combinatorial expansion 19–33.
Conflict helix 241–266.
Control systems 161–178.
Controlled random search 121–137.
Core system 19–33.
Cross-level hypotheses 121–137.
Cusp catastrophe model 121–137.
Decider 66–76.
Day, Diana L.: see Terence A. Oliva.
Decision making 4–18; 34–41, 42–52; 161–178, 267–273.
Desarbo, Wayne S.: see Terence A. Oliva.
Dowling, Grahame R. Identifying systems, 149–152.
Eisler, Riane: see Loye, David.
Energy 212–231.
Energy demand 190–211.
Evolutionary system 19–33.
Evolutionary theory 53–65.
Expectation states theory 42–52.
Expert system 274–292.
Feedback 34–41.
Frischknecht, Federico. Positivist bias misses the symbol system point, 234–237.
Fuzzy sets 267–273.
Friedman, Linda Weiser. Design and analysis of multivariate response simulations: The state of the art, 138–148.
Gain-loss theory 42–52.
Game theory 4–18.
Generative condensation 19–33.
Global models 212–231.
Hanges, Paul J.: see Robert G. Lord.
Hatcher, Joe W., Jr. Arguments for the existence of a general theory of behavior, 179–189.
Hierarchies of systems 149–152, 153–158.
Hospital 304–314.
Hotelling's T2 Test 138–148.
Index for 1987 316–317.
Interaction patterns 92–105.
Jedidi, Kamel: see Terence A. Oliva.
Lee, Hans, Olin, Wayne A., and Shelly, Robert K. Gain-loss and expectation states theories, 42–51.
LeGare, Miriam. The use of general systems theory as metatheory for developing and evaluating theories in the neurosciences, 106–120.
Living systems process analysis 293–303, 304–314.
Logic of events 92–105.
Lord, Robert G. and Hanges, Paul J. A control system model of organizational motivation: Theoretical development and applied implications, 161–178.
Loye, David and Eisler, Riane. Chaos and transformation: Implications of nonequilibrium theory for social science and society, 53–64.
Lusher, Connie: see Stephen L. Merker.
Management theory 34–41, 161–178.
Matter-energy flows 81–91.
Merker, Stephen L. and Lusher, Connie. A living systems process analysis of an urban hospital, 304–314.
Merker, Stephen L: see Denise Bryant.
Metamodel 138–148, 232–233.
Miller, James Grier. Lorraine Bouthelet, 1–3.
Mischler, Elliott. Review of *Interaction Structure and Strategy.* 77–78.
Money flows 81–91.
Montero de Juan, Javier. Arrow's Theorem Under Fuzzy Rationality, 267–273.
Motivation 161–178.
Multivariate response 138–148.
Natural systems 179–189.
Neural systems 106–120.
Neuroscience theory 106–120.
Nonlinear estimation 121–137.
Olin, Wayne A: see Lee, Hans.
Oliva, Terence A., Desarbo, Wayne S., Day, Diana L. and Jedidi, Kamel. GEMCAT: A GEneral Multi-

Metamodel 138–148, 232–233.
Miller, James Grier. Lorraine Bouthelet, 1–3.
Mischler, Elliott. Review of *Interaction Structure and Strategy.* 77–78.
Money flows 81–91.
Montero de Juan, Javier. Arrow's Theorem Under Fuzzy Rationality, 267–273.
Motivation 161–178.
Multivariate response 138–148.
Natural systems 179–189.
Neural systems 106–120.
Neuroscience theory 106–120.
Nonlinear estimation 121–137.
Olin, Wayne A: see Lee, Hans.
Oliva, Terence A., Desarbo, Wayne S., Day, Diana L. and Jedidi, Kamel. GEMCAT: A GEneral Multi-

variate methodology for estimating CATastrophe models, 121–137.
Ontology 232–233.
Organizational systems 190–211, 293–303, 304–314.
Phenomenology 234–237.
Population dynamics 92–105.
Positivism 234–237.
Producer 66–76.
Public transit system 293–303.
Rao, Ashok, Thornberry, Neil and Weintraub, Joseph. An empirical study of autonomous work groups: Relationships between worker reactions and effectiveness.
Rummel, R. J. A catastrophe theory model of the conflict helix, with tests, 241–266.
Shelly, Robert K.: see Lee, Hans.
Social behavior 179–189.
Sterman, John D. Expectation formation in behavioral simulation models, 190–211.
Swanson, G. A. Accounting information can be used for scientific investigation, 81–91.
Sylvan, Donald A. Supplementing global models with computational models. An assessment and an energy example, 212–231.
System dynamics 190–211.
Systems simulation 138–148, 190–211, 212–231.
Thornberry, Neal: see Rao, Ashok.
Transformation theory 53–65.
Two-person games 4–18.
van Gigch, John P. A misapplication of the metasystem concept, 232–233.
Violence 241–266.
Ward, Lawrence M.: see Alvarez, Juan M de Lorenzana.
Weintraub, Joseph: see Rao, Ashok.
Worker perception 66–76.
World problematique 53–65.
